IPSO ANNUAL STATEMENT 2018

Introduction

At Future, we pride ourselves on the heritage of our brands and loyalty of our communities. We help dedicated enthusiasts follow their passion through high-quality content, unique experiences and innovative technology.

First set up with one magazine in 1985, Future now boasts a portfolio of over 80 brands produced from operations in the UK, US and Australia. Every day, innovation is at the core of what we do: put simply, we push boundaries.

In recent years, Future has made a number of acquisitions in the UK. These include Blaze Publishing, Imagine Publishing, Team Rock, Centaur's Home Interest brands, NewBay Media, several Haymarket publications and two of Immediate's cycling titles. Today, Future employs approximately 1,000 employees worldwide and the company's leadership structure as of 8 February 2019 is outlined in Appendix 2.

Our core portfolio covers consumer technology, games/entertainment, music, creative/design, home interest, photography, hobbies, outdoor leisure and B2B. We have over 50 monthly magazines and publish over 500 one-off 'bookazine' products each year. Globally, 173 million users access Future's digital sites each month, and we have a combined social media audience of 115 million followers (a list of our titles/products can be found under Appendix 1a. & 1b.).

For the purpose of this statement, Future's 'responsible person' is Paul Newman, Brand Director, Home Interest.

Editorial Standards

Through our expertise in 11 different content 'verticals', Future produces engaging, informative and entertaining content across a number of channels and to a high standard. The business is driven by a core strategy – 'Content that Connects' – that has been in place since 2014. This puts content at the heart of what we do, and is an approach we reiterate in our internal communications strategy through regular staff briefings.

At Future, we believe everyone involved in editorial decision making shares responsibility for the content we publish. And in order to ensure there is clear accountability, we recently created the new role of Chief Content Officer on our Executive Leadership Team to ensure there was one person in the company's senior management setup with visibility over the company's entire output and responsible for upholding editorial standards.

Each of the content teams in our 'verticals' is led by at least one senior editorial manager – this senior editorial manager is responsible for upholding the highest editorial standards possible, ensuring no breaches of IPSO's Editors' Code of Practice occur and providing guidance to more junior staff.

Future takes all reasonable and appropriate steps to verify what we publish. Such steps include double sourcing where necessary, and rigorous scrutiny of information and sources to ensure the accuracy of the articles we publish.

Editorial process for contentious issues involves second reading by editorial. Pre-vetting of articles by Future's in-house legal team is available for any concerns. External advice is sought for contentious issues.

Licenses and consents are obtained prior to publication, save where use of material falls within an exemption to copyright law (e.g. fair dealing).

Beyond technical advice, Future does not have internal manuals, codes or guidance used by our journalists. However, Future refers to the Editors' Code of Practice as the basis for its editorial standards.

Complaints Procedure

Future would seek guidance from IPSO regarding serious and bespoke complaints that go beyond run-of-the-mill customer queries and issues that we have no precedent in dealing with.

To date we haven't sought pre-publication guidance from IPSO, but would have no hesitation in doing so if advice was required on interpreting the Editors' Code of Practice or understanding the public interest exception.

Editorial complaints are dealt with at a 'local' level, i.e. on a brand-by-brand basis, to ensure the query or complaint is kept close to the expertise. Where necessary, complaints are escalated to the relevant senior editorial manager or Chief Content Officer. In the year to date we recorded no such instances of serious editorial complaints and only two minor complaints that have been referred to IPSO.

Any issues related to copyright infringement are dealt with by Future's in-house legal and rights teams, and referred to external advisors where necessary.

Pursuant to the supplementary requirement issued by IPSO in December 2014, we have added information in the About Us pages on our sites which inform our users:

1. that we are regulated by IPSO
2. that we abide by the Editors' Code of Practice
3. of the email address for each site to use in case of a complaint
4. of the ways in which they can contact IPSO for more information about IPSO or the Editor's Code.

Here is an example from techradar.com that can be viewed at <http://www.techradar.com/news/about-us>

TechRadar is a member of the Independent Press Standards Organisation (which regulates the UK's magazine and newspaper industry). We abide by the Editors' Code of Practice and are committed to upholding the highest standards of journalism. If you think that we have not met those standards and want to make a complaint please contact news@techradar.com. If we are unable to resolve your complaint, or if you would like more information about IPSO or the Editors' Code, contact IPSO on 0300 123 2220 or visit www.ipso.co.uk.

It is worth noting that Future has been expanding rapidly in recent years and, consequently, due to the ongoing integrations of acquired businesses and the associated technological challenges, not every Future website will be completely up to date at the time of the submission of our annual report.

In response to the supplementary requirement issued by IPSO in February 2016, we acknowledge that before making any substantive changes to an online article or other material in response to a complaint, editorial staff archive a complete copy of the article or other material under complaint. (This does not include trivial changes, such as changes to spelling or grammar.) The archived copy must be retained for a minimum of four months from the date of the amendment to ensure that IPSO has access to a copy of the material under complaint, should it subsequently receive a complaint.

Additionally, Future notes IPSO's request made in February 2019 for the voluntary submission of policies in place relating to transparency regarding financial relationships or conflicts of interest involving the editorial process. As noted above, Future has acquired numerous businesses in recent times and is in the process of integrating these businesses operationally and culturally. As a consequence we acknowledge that some of our policies need to be updated and revisited and we are committed to sharing this information with IPSO at the appropriate time.

Training Process

Future takes the training of editorial staff very seriously and the company's newly appointed Chief Content Officer is responsible for ensuring journalists are kept up to date with the latest best practice regarding editorial standards.

Shortly before submitting our last annual statement we took steps to embed the Editors' Code of Practice with our editorial teams, requesting that every journalist read and confirm they have understood the Editors' Code of Practice and distributing the Editors' Codebook to all journalists. This year we have asked all journalists who were on staff last year to refresh their knowledge of the Code of Practice and requested senior editorial managers to ensure new starters or recently acquired staff have read the Code of Practice and Codebook.

Where appropriate, Future's legal and rights team meet with new joiners on a one-to-one basis to run through the basic principles of copyright law and our contracts. We have also held 'group' rights-refreshers with specific teams where issues have arisen. We are working through all editorial teams to make sure everyone has clear guidance. Alongside this we have:

- been working through all the IP-related guidance notes we have and updating them to circulate to teams as part of the refresher process

- rolled out a formal rights training programme to all content 'verticals'

In previous reports it was noted that there had been an inevitable impact on our ability to deliver Libel, Defamation and IP training in recent years due to Future's restructuring and downsizing in the pre-2017 period. However, in late spring 2018 we contracted a highly-respected external supplier to deliver a comprehensive series of media law refresher courses for all journalists currently employed in Future's UK business. Our in-house Legal team has also developed its own refresher training materials, which can be delivered to smaller teams in more focused sessions as and when necessary.

Compliance Record

Since Future submitted its previous statement (for 2016), there has only been one complaint made against Future ruled on by IPSO's Complaints Committee – Reference: IPSO: #00178-19# – against FourFourTwo magazine. Upon reviewing the complaint IPSO found that the article in question was not in breach of the Editors' Code. A second complaint relating to the website Kotaku.co.uk [IPSO: #00197-19#] is under review at the time of writing.
